

# TECHNICAL DATA ULTRACUT 250 HW

# Hard Water Stable General Purpose Long Life Cutting Fluid

#### **Description**

ROCOL Ultracut 250 HW is a high quality general purpose soluble oil water mix cutting fluid, formulated to provide a long and predictable sump life in hard water conditions (above 250ppm). It is designed for light/medium cutting operations on ferrous and non-ferrous metals. It contains a high percentage of refined mineral oils affording a high degree of residual corrosion protection and lubricity whilst machining. ROCOL Ultracut 250 HW rejects tramp oil, is low foaming and forms a milky emulsion when mixed with water.

### **Outstanding Features**

- Emulsion stability in all normal and hard water conditions
- · Long and predictable sump life
- Suitable for use with a wide range of ferrous and non-ferrous metals
- Excellent residual corrosion protection
- Good cutting performance
- Inherently resistant to degradation
- Low foaming
- · Rejects tramp oil
- · Ideal for individual and central cutting fluid systems
- Pleasant and safe to use

#### **Directions for use**

**Recommended dilution:** ROCOL Ultracut 250 HW should be used between 15:1 and 35:1 depending on the severity of the operation, workpiece material and water hardness. To ensure dilution accuracy, it is preferable to use a ROCOL Automatic Fluid Mixer. For manual mixing, add the concentrate to water at the recommended dilution ratio, stirring continuously.

The information in this publication is based on our experience and reports from customers.
here are many factors outside our control and knowledge which effect the use and performance of our products for which reason the information in this publication is given without responsibility

It is advisable to use the appropriate ROCOL Ultraguard Machine Tool Care product at fluid changeovers. Optimum fluid life is obtained by adequate initial machine cleaning, correct dilution control and regular maintenance of fluid, particularly prior to weekends and shutdown periods.

#### **Technical Data (typical values)**

Appearance: Clear amber liquid forming a white

emulsion when mixed with water.

Odour: Mild

pH: 9.4 at 25:1

Density at 20°C: 0.94 g/cm<sup>3</sup>

Storage: Store at normal ambient

temperature (5 to 30°C)

#### Refractometer calibration:

Dilution ratio	10:1	15:1	20:1	25:1	30:1	35:1	40:1
Refractometer reading	9.2	6.5	4.7	4.2	3.2	2.9	2.6

## Pack sizes and part codes

20 ltr part code 51483 200 ltr part code 51489
